

Picture this: you're looking through your phone gallery trying to find pictures with your significant other to prepare an anniversary gift for them. But your gallery is a mess. Half the pictures there are screenshots of the assignments that you can barely keep up with in school.

With Timeline, this is no longer an issue. Timeline lets you store memories in a manner that's so intuitive, yet so underutilized. Timeline allows you to create lines, which are basically a collection of memories that are arranged in chronological order. Each memory can contain multiple pictures, a description and a location. Now, you can scroll through memories in each line to reminisce, or look at memories that happened on a certain date.

Wait, what's so special about that? Doesn't Instagram do that with stories and highlights? Well yes they do, but we do it so much better.

Once you open a particular highlight in Instagram, you have to keep tapping until you find the specific memory that you want to see. Now, what if you want to add a new picture to it? Well, you can't. Instagram does not let you edit old stories. This means that if you want to edit descriptions or add more photos to a particular memory, you're out of luck. Fret not, Timeline lets you add photos to individual memories whenever you want to! You can also edit other information in the memory as you please.

That's not all. Timeline can also display your memories in a way that has never been done before. Our innovative map view allows you to view memories on a map that 'connects the dots' between the different locations you've been to. You can easily view all the places you've been to for each line. And it goes without saying that you can just click and take a look at what you did at that location. How sweet is that!

If these features sound too good to be true, you'd be happy to know that we have a lot in store for the future. Here's a sneak peek.

In the near future, Timeline will allow you to create lines that can be shared with others. This means you and your loved ones can document memories together. We'll also be letting you print your lines into physical scrapbooks for your collection. This will be the perfect gift for your loved ones or a wonderful addition to the bookshelf at home!

So what are you waiting for? Check out Timeline at <https://cs3216-timeline.netlify.app/> or by scanning the QR code below!
